Teeth Whitening (HOME)

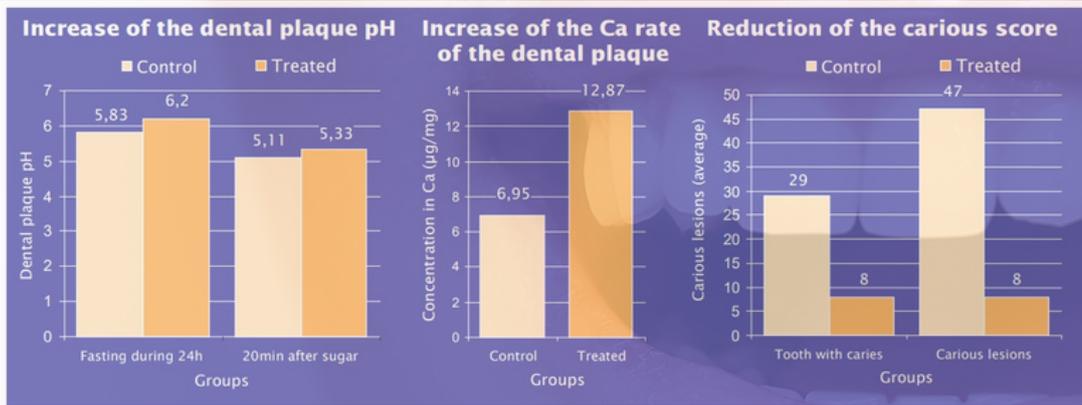

Dental grade 3% Hydrogen Peroxide + NaF + Furdentyl™ :

Tooth mineralization

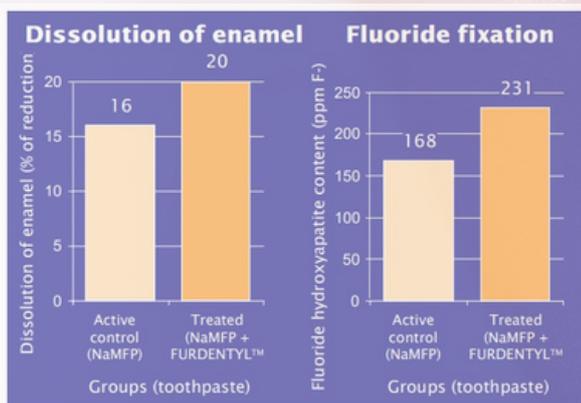

Application : Pen /Syringe

Furdentyl™ :
Tooth mineralization

Furdentyl™ :
Tooth mineralization

Furdentyl™ is a calcium salt of monoglycerphosphoric acid containing more than 80% α isomer. It has a protective effect against acid attacks and favors tooth mineralization providing calcium and phosphorus. Furdentyl™ also improves fluorine fixation from Teeth Whitening (HOME) and decreases the quantity of sodium monofluorophosphate, which is a caries formation and relatively toxic ingredient.

Furdentyl™ has a double action against caries. It can be used as a nutritional ingredient in health foods and particularly in confectionery in accordance to US regulation (GRAS – 21 CFR 184.1201) and EU regulation (Directive 2002/46/EC & 2001/15/EC). It can also be used for oral hygiene products as toothpaste and before & after brushing solution. This product is a white crystalline powder with a neutral taste/odor.

HOME Bleaching (Pen 2g. / Syringe 3g.) 3% Hydrogen Peroxide + NaF Furdentyl™ Tooth mineralization

About this item

Effective and Affordable: The teeth whitening pen will provide rapid whitening results with 2 uses of daily application without feeling any sensitivity. People can see the visible whitening effect by using it for 1-2 weeks. Just need a teeth whitening pen, no need to visit the Beauty Clinic with complicated process anymore.

Safe and Mild Ingredients:

The active ingredients of our teeth whitening gel pen are safe and not sensitive. It can effectively and quickly remove years of stains caused by coffee, tea, wine, smoking, soda, and more. The teeth whitener has a hint of mint. If you don't like the taste, rinse it off after using 20 minutes. Your mouth will feel fresh and clean with no residue.

Easy to Apply: Teeth stain remover pen is used in a similar way to lipsticks. Twist the bottom of the pen clockwise, then the whitening gel will flow from the gel chamber into the brush. Then you can gently paint each tooth. Use the teeth whitening kit twice a day, hold on for two weeks. Teeth will become whiter and whiter. (Note that see the packaging for full instructions)

Satisfaction:

Teeth whitening products need to be used consistently, and the effect will gradually show with the prolongation of use time. We're so confident you'll love our teeth whitening pen that we'll refund every penny if you don't like it! If you have any problem with it, refund or replace a new one quickly, contact us anytime for help.

OUR PROFESSIONAL :

Dental grade 3% Hydrogen Peroxide application pen

Gel Ingredients:

- Glycerin, Propylene Glycol , Deionized Water, Hydrogen Peroxide, Carbomer, EDTA , Furdentyl , NaF , Potassium Nitrate , Menthol

2g.

HOW TO USE TEETH WHITENING PEN:

1. Apply the vaseline on your lips
2. Open your mouth with your lips stretched away from your teeth
3. Brush on the product in short, vertical strokes along the surface of each tooth.
4. Hold your mouth in place for 1 minute to set the product.
5. Rinse out the whitening product with warm water.
6. Keep applying the product daily for at least 1 week.

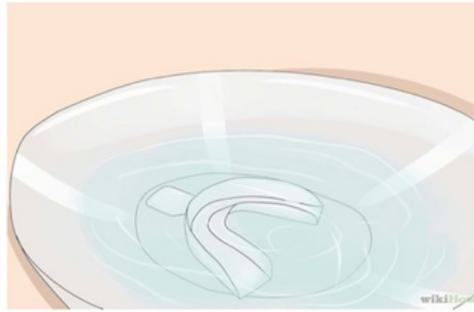

CAUTION:

- Avoid eating or drinking anything for at least 30 to 60 minutes. This will allow the teeth whitening product to fully absorb into your teeth and provide amazing results.
- Do not use this product if suffering from dental ulcers, broken gum, or after oral surgery.
- The user with sensitive teeth shall reduce the application times or use it under the guidance of dentist.
- Not for the persons under the age of 16 and pregnant women.
- Discontinue use if you feel unwell.

How To Use Teeth Whitening Gels

3g.

1. Bring water to a boil, remove from heat and wait 1 minute. Put tray in water for 10 seconds.

2. Remove tray from water. Put the warm tray in your mouth and gently press to mold to your teeth. Repeat steps 1 & 2 for bottom tray.

3. Take mouth trays and evenly spread the gel inside tray. Use 0.5ml in each tray.

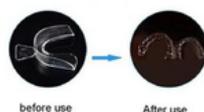

4. Put the tray back into your mouth and leave for 30 minutes. Use LED light for faster results.

5. Rinse and dry mouth piece off and put away for next use.

- * **Keep your mouth piece clean and store in dry place**
- * **Read all written instructions and warnings carefully on website before starting treatment.**
- * **Consult with a dentist before beginning whitening treatments.**
- * **Can use treatment up to 1 hour but do not exceed.**
